

## **IMPORTANT SAFETY NOTICE: HINGE BAR MAINTENANCE**

**When servicing Edbro tipping cylinders it is essential to check on the condition of the rear hinge bar. Everyday wear and tear can build up over time and cause damage to the hinge bar which can result in serious accidents.**

**If hinge bars are not regularly checked and replaced when worn the consequences can result in the vehicle tipping over and causing severe damage to property and, more importantly, the vehicle operator and any other people nearby.**

**For advice or assistance call Edbro Service on +44 (0) 1204 902236.**
